RE: Letter of Recommendation, GCW Commercial Division

To Whom it May Concern,

We are pleased to provide this letter of recommendation for GCW Commercial Division in relation to their capability as a commercial millwork contractors.

We have successfully completed several large renovations, new buildings and addition projects over the last several years with GCW Commercial Division, previously operating as Milestone Commercial. We'd like to specially note their exemplary performance on a 106 unit 5 storey multi-residential building project know as Sally Creek Apartments; completed in 2017. Further, they excelled at a design-build millwork contract in a large office in an addition to Toyota Boshoku manufacturing facility.

GCW Commercial Division is very professional and easy to deal with. Their organizational ability and design/pricing skills were excellent.

GCW Commercial Division is also very capable of managing their work with regard to the project schedule, quality and workmanship.

We recommend GCW Commercial Division for consideration for projects with commercial millwork.

Please contact me directly should you require any further information.

Sincerely,

Sierra General Contracting Inc.
